OBJECTIVE

Data Analyst with strong foundation in **AI/ML automation**, **process optimization**, and **workflow development**. Experienced in Python automation, AI tools (ChatGPT, Power Automate, Copilot), and data analysis using Excel, SQL, Python, and Power BI. Passionate about leveraging **generative AI** and automation to streamline flight management operations and drive data-driven decision-making.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C

AI & Automation Tools: ChatGPT, Microsoft Copilot, GitHub Copilot, Power Automate, OpenAI API

Data Analysis & BI Tools: Power BI, Tableau, MS Excel (Advanced), Pandas, NumPy, Matplotlib

APIs & Integration: REST APIs, JSON, API Testing, Workflow Automation, ETL Pipelines

Databases: SQL, Query Optimization, Database Design

Version Control: Git, GitHub, Collaborative Development

AI/ML Concepts: Large Language Models (LLMs), Generative AI, Prompt Engineering, AI-Assisted Development

Core Competencies: Process Automation, EDA, Workflow Design, Documentation, Risk Management

Soft Skills: Analytical Thinking, Problem-Solving, Communication, Adaptability, Stakeholder Management

EDUCATION

Vignan's Lara Institute of Technology and Sciences
Bachelor of Engineering in Electrical and Electronics Engineering

Oct 2022 – May 2026
CGPA: 8.02/10

EXPERIENCE

Data Analytics Intern

Dec 2025 – Feb 2026

Global Quest Technologies

Remote

- Gained hands-on experience with Excel, SQL, Python, and Power BI by analyzing structured datasets and generating actionable insights for business decision-making.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Python (Pandas, NumPy) to identify trends, patterns, and data quality issues across multiple datasets.
- Developed interactive dashboards and visual reports using Power BI with DAX measures to present insights in a clear, structured manner to stakeholders.

PROJECTS

AI-Powered Flight Data Analysis & Automation | *Python, ChatGPT API, Power Automate, SQL, Power BI*

- Built an automated workflow using Python and Power Automate to process flight planning data, reducing manual reporting time by 60% and improving operational efficiency.
- Integrated ChatGPT API for automated generation of flight operation summaries, anomaly detection in scheduling data, and intelligent report creation.

Intelligent Document Processing with GenAI | *Python, OpenAI API, Microsoft Copilot, Excel*

- Created an AI-assisted automation tool to extract and summarize key information from operational documents, reports, and flight manuals using LLM APIs.
- Used advanced prompt engineering techniques to optimize LLM outputs for structured data extraction, classification, and automated documentation.
